About The Project

About the Project:

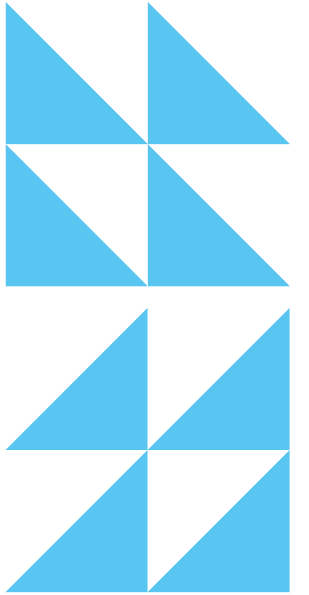

- ✓ The **Gym Fitness and Equipment Sales Management System** is designed to streamline gym product sales and fitness training services. It provides a structured and user-friendly approach for both admins and users.

- ✓ **For Admins:**

- Manage inventory, update prices, and track sales.
- Oversee training programs & provide personalized fitness solutions.
- Add new products and training programs.

- ✓ **For Users:**

- Browse & purchase gym equipment online.
- Enroll in online/offline training programs.
- Book personal training sessions & access diet plans.
- Use the BMI calculator to track fitness progress.

Objectives:

- ✓ **The Gym Fitness and Equipment Sales Management System streamlines product sales, inventory management, and fitness training while offering wellness services.**

- **Admin Features:**

Update product details, track sales, and manage fitness programs.

- **User Features:**

Browse and purchase gym equipment, enroll in training programs, and access personalized services like BMI calculator, diet plans, and personal training.

- **Key Functionalities:**

Automates product listings, order management, sales tracking, and session bookings.

Secure payments and data protection ensure smooth transactions.

- **Impact:**

Improves efficiency, customer experience, and data security, while being scalable for future growth and adaptable to various gym businesses.

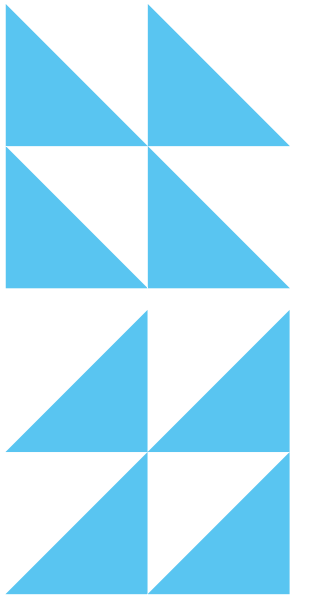

Requirements:

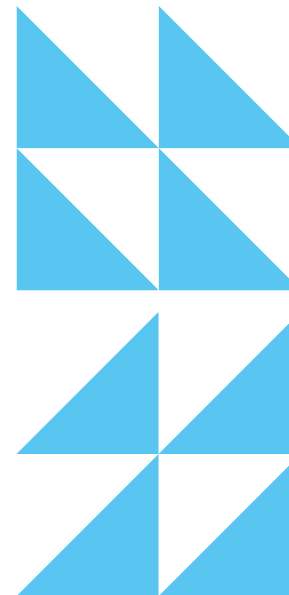

Software :

- **Operating System : Windows 11**
- **Front End : HTML, CSS, JS**
- **Back End : Python(flask)**
- **Database : MySQL**
- **Tools : XAMPP**

Hardware :

- **Processor : AMD RYZEN 5**
- **Ram : 16GB**
- **Storage : 512 GB SSD**
